

VEHICLE BUILD AND SUPPLY

KEEPING BRITAIN MOVING

FITTED TO PERFECTION

No other fleet management company offers the breadth and experience of vehicle modification and design that Rivus does. Our engineers can develop vehicles to meet pretty much anything your industry demands – all to the highest safety standards and with the appropriate standard certifications and compliance.

We're experts in designing and fitting vehicle modifications on anything, from vehicle racking

in all sizes of vans, to complex work from vehicles up to full 44 tonne. We work closely with both the equipment and base vehicle manufacturers to ensure your requirements are met without compromising on safety or quality.

We'll help you find the right base vehicles, help with funding for acquisition, and use our expert engineering ability to give you the exact vehicles you need for your work.

Our key areas of focus are:

- + Full racking solutions
- + Specialist platforms and elevators
- + All types of onboard power equipment
- + Specialist plant and trailers

WE PRIDE OURSELVES
ON OUR ABILITY TO
FIND A SOLUTION FOR
EVERY OBSTACLE

KEEPING YOU ON THE ROAD

We manage several manufacturer warranties on behalf of our customers, as well warranties for both the conversion and the equipment – taking a complex job off your hands.

This capability also means that customers don't need to return vehicles to the manufacturers or converters, speeding up the process of returning

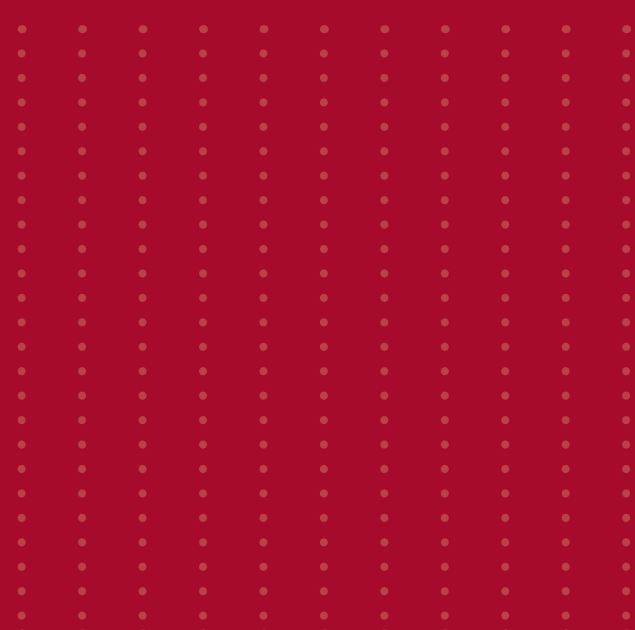

the vehicle back into service and minimising Vehicle off Road (VoR).

In 2019, we created over £76 million in VoR savings for one of our customers, simply because we can focus on getting critical vehicles back on the road quickly, especially when the alternative of hiring is not an option.

THERMAL INVESTIGATIONS

In the unfortunate event of a fire, whether it's to one of our vehicles or not, we're able provide thermal investigations in an impartial and highly comprehensive way. This will confirm exactly how

a fire has started so that you will know where liability lays – helping you with any court cases or claims, such as insurance or compensation. Please speak to us for a competitive price.

MOVING TOWARDS A GREENER FUTURE

As the motor industry goes through what is undoubtedly the greatest change since the introduction of the internal combustion engine, we're at the sharp end of the transformation.

We test the full range of alternative powered technologies – including pure EV, hydrogen and hybrid. We do this with our own staff in real-life conditions.

Many of these tests take place over extended periods, often 12 months, to better understand the capabilities of these technologies for our customers.

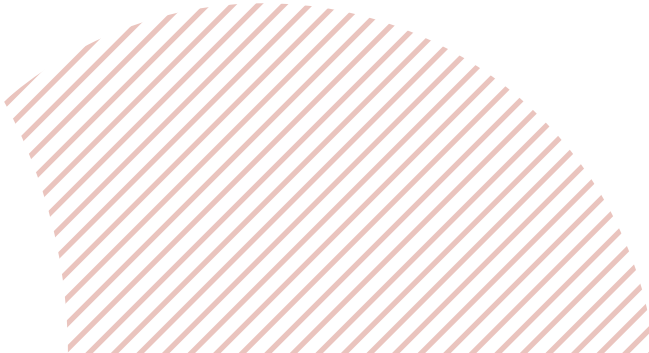

We also provide service, maintenance and repair infrastructure to several alternative fuel vehicle manufacturers in the UK – meaning our garage network is already moving seamlessly to embrace a new and sustainable future.

WHY RIVUS?

Rivus is one of the UK's largest providers of fleet management solutions, enabling customers to minimise their cost of vehicle ownership, maximise vehicle availability, reduce emissions and control compliance responsibilities.

We support fleets of all sizes and have a UK-wide network of 55 garages with multi-skilled technicians, backed up by a mobile support team.

We believe that great customer service comes from trust, communication and taking ownership. Our high standards are demonstrated in the winning of 11 awards since 2016 for innovation, fleet management and customer service.

WHO DO WE SERVE?

We cater for small vans, HGVs and everything in between. While we specialise in essential operational fleets, we can support anyone with fleet

requirements and have done so for many of the UK's biggest and most well-known fleet operators.

We have a long history of supporting key sectors, such as:

EMERGENCY SERVICES

FREIGHT

ENVIRONMENT

UTILITIES

GOVERNMENT

COMMUNICATIONS

Here's a comprehensive list of what our vehicle design team can provide:

- + Vehicle design and build
- + Multi-agency customer sign-off, including Health & Safety and unions
- + Vehicle selection advice
- + Recall work for manufacturers
- + Customer bespoke recall requests, including all development work
- + Customer order work, along with design solutions
- + Vehicle weight exercises
- + Events support
- + Prototype build
- + Fire investigation
- + Design and management of service schedules
- + Warranty management
- + Tools and product supply
- + Workshop diagnostic to manufacturer standards
- + Alternative fuels and future technology specialists
- + Meets all compliance standards
